Physics

- The study of matter and its motion through space-time, as well as all applicable concepts, such as energy and force. More broadly, it is the general analysis of nature, conducted in order to understand how the universe behaves.

Question: 1

Science
or
Pseudoscience

Astrology

- A group of systems, traditions, and beliefs which hold that the relative positions of celestial bodies and related details can provide information about personality, human affairs and other "earthly" matters. A practitioner of astrology is called an astrologer. Astrologers believe that the movements and positions of celestial bodies either directly influence life on Earth or correspond to events experienced on a human scale.

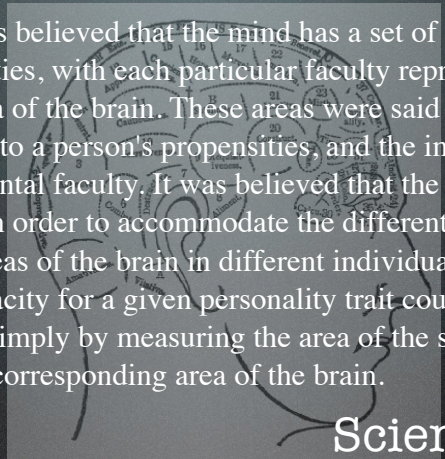

Question: 2

Science
or
Pseudoscience

Phrenology

- Phrenologists believed that the mind has a set of different mental faculties, with each particular faculty represented in a different area of the brain. These areas were said to be proportional to a person's propensities, and the importance of the given mental faculty. It was believed that the cranial bone conformed in order to accommodate the different sizes of these particular areas of the brain in different individuals, so that a person's capacity for a given personality trait could be determined simply by measuring the area of the skull that overlies the corresponding area of the brain.

Science

Question: 3

or

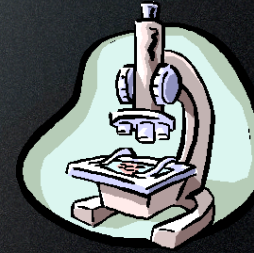

Pseudoscience

Biology

- Concerned with the study of life and living organisms, including their structure, function, growth, origin, evolution, distribution, and taxonomy.

Question: 4

Science
or
Pseudoscience

Chemistry

- Concerned with the composition, behavior, structure, and properties of matter, as well as the changes it undergoes during chemical reactions.

Question: 5

Science
or
Pseudoscience

UFology

- Collective efforts of those who study reports and associated evidence of unidentified flying objects (UFOs).

Question: 6

Science
or
Pseudoscience

Astronomy

- Deals with the study of celestial objects (such as stars, planets, comets, nebulae, star clusters and galaxies) and phenomena that originate outside the Earth's atmosphere.

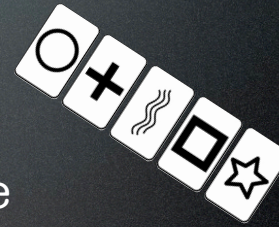

Question: 7

Science
or
Pseudoscience

Parapsychology

- Seeks to investigate the existence and causes of psychic abilities and life after death using the scientific method.

Question: 8

Science
or
Pseudoscience

Geology

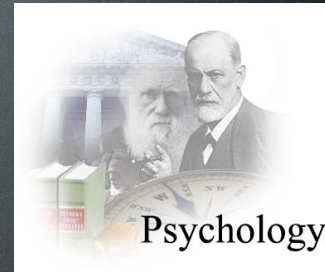

- study of the physical matter and energy that constitute the Earth. The field of geology encompasses the study of the composition, structure, properties, and history of the planet's physical material, the processes by which it is formed, moved, and changed, the history of life on Earth, and human interactions with the Earth.

Question: 9

Science
or
Pseudoscience

Psychology

- Definition???

Question: 10

Science
or
Pseudoscience
